

The all-in-one payment terminal that surpasses all others

Eclipse™ Payment Terminal

TeleCheck®, a long time pioneer in the check acceptance industry, is again leading the way with a sleek, new payment terminal that is the perfect alignment of form and functionality.

The Eclipse™ payment terminal's multi-payment capability, integrated inkjet printer and check reader allows you to incorporate your payment needs into one piece of equipment.

Utilizing the Eclipse payment terminal, you can authorize and settle credit cards, (including Visa® and MasterCard® Purchasing Card, Level II), and debit cards, along with the revolutionary TeleCheck® Electronic Check AcceptanceSM (ECA®) service. Special industry options are also available.

Features

- Touch Screen Capability
- Integrated Inkjet Printer
- Integrated Check Reader
- Voids and Franks Checks Automatically
- Driver's License Magnetic Swipe
- Full Reporting Capability
- Stores 300 check and 300 card transactions

The Eclipse™ payment terminal

Specifications

Power

Thermal power requirements:
DC power pack: 12 V DC at 1.5 A

Environmental

Operating temperature: 0° to 40°C (32° to 104°F)
Storage temperature: -18° to +66°C (0° to 150°F)
Humidity: 15% to 95% relative humidity;
no condensation

Dimensions

Height: 75 mm (3.95 in)
Width: 146 mm (5.75 in)
Depth: 290 mm (11.4 in)

Weight

Terminal unit weight: 1.82 kg (4.0 lb)
Shipping weight: 3.86 kg (8.5 lb); includes terminal,
power adapter, telephone line cable, paper roll and
plastic spindle, and box containing inkjet cartridge

The power of the check without the paperSM

TeleCheck[®] Electronic Check AcceptanceSM (ECA[®]) Service

Introducing a revolutionary process of check acceptance that will change the way you think about checks now—and in the future. The TeleCheck[®] Electronic Check AcceptanceSM (ECA[®]) service turns paper checks into electronic items automatically at the point-of-sale to provide you and your customers fast, easy, accurate and secure check processing.

TeleCheck, a pioneer in the check acceptance industry since 1964, is again leading the way into a new era of check acceptance with this revolutionary new process.

Features and Benefits

It's Fast

Utilizing the new Eclipse[™] payment terminal, the ECA service converts paper checks into electronic items right at the point-of-sale and automatically deposits these funds into your bank checking account.

This saves you time at day's end. Just close the batch and print the check detail or summary report—it's that fast. Your checks are processed—reducing paperwork and trips to the bank.

It's Easy

Simply insert the paper check into the Eclipse payment terminal and enter prompted information. TeleCheck will authorize the check, and an ECA receipt will print for the check writer to sign.

This signature allows TeleCheck to electronically present the transaction to the check writer's bank for settlement. The paper check will automatically be voided allowing you to return the check to the customer.

It's Accurate and Secure

The state-of-the-art check reader reduces clerk input error.

And with the ECA service and the TeleCheck check guarantee service, you'll never see a returned check or returned check fees. The bad check or transaction is the responsibility of TeleCheck.

Your Customers Also Benefit with ECA

Your customers will still enjoy the same float as paper checks, reduce the risk of their personal information being used fraudulently, and receive a complete record of the transaction on their bank account statements.

Customers still have a choice—If the check writer is uncomfortable with the ECA process, then the check can be franked automatically and processed as a paper check.

However, research and test markets show that once your customers understand the ECA service, they not only realize it is a safe and secure process—they don't want to go back to the old paper process!
