

T7 Plus Terminal

integrated terminal with high-performance printer

Get the next generation T7 POS terminal:

- Eliminates paper jams with revolutionary SureLoad printer
- Prints receipts in half the time of previous generation printers
- Supports longer paper rolls for fewer paper changes
- Reads driver's licenses for positive ID with triple track reader
- Operates quietly and quickly

The Hypercom® T7 Plus builds on the heritage of Hypercom's popular T7 family of terminals selling more than 3 million units. This latest model is designed for merchants requiring a compact countertop POS terminal accepting all magnetic stripe cards and delivering fast online transaction authorizations.

The T7 Plus features the completely new SureLoad™ printer with significantly faster receipts delivery. It allows paper rolls to simply be dropped in place without feeding through slots and rollers and supports longer paper rolls at the request of the merchant community. The T7 Plus uses thermal paper and silently prints graphic logos directly on receipts. Its quiet operation is welcomed by both merchants and customers. An external PIN pad can be attached where required. Support for new smart cards and EMV-compliant software are both available, along with improved peripheral connectivity. Secondary power supplies are often no longer needed.

The 35-key keyboard allows one-step initiation of all daily functions and transaction types. Full compatibility with previous T7 software reduces certification requirements and training issues. The T7 Plus delivers a powerful feature set in an attractive, compact design. It offers low overall cost of ownership thanks to its high reliability, communications capabilities, easy operation and advanced remote software management. The T7 Plus is a safe choice for merchants wanting a new credit/debit card POS terminal.

Hypercom T7 Plus Terminals. Did it! Done it! Own it!

Hypercom Corporation (NYSE:HYC) is the leading global provider of electronic payment solutions that add value at the point-of-sale for consumers, merchants and acquirers, and yield increased profitability for its customers. Hypercom products include secure, Web-enabled card payment terminals that work seamlessly with its networking equipment and software applications for e-commerce, m-commerce, smart cards and traditional payment applications. The company's widely-accepted ePOS-innocommerce (epic) framework of consumer-activated, EMV-certified, touch-screen ICE (Interactive Consumer Environment) terminals enable acquirers and merchants to decrease costs, increase revenues and improve customer retention. Headquartered in Phoenix, Arizona, USA, Hypercom is independently acknowledged as the leading provider of point-of-sale card payment terminals worldwide. Demand for Hypercom terminals surpassed one million units last year alone. Hypercom today maintains an installed base of more than 5 million card payment terminals in over 100 countries that conduct more than 10 billion transactions annually.
